<u>NOVEMBER 2019</u>

1. The solar project the LADWP has been working on for the past year, was the focus of an article. Here is the link the article regarding Mayor Garcetti's dedication to supporting the idea of alternative means of energy.

https://ladwp.response.news/mayor-garcetti-celebrates-final-approval-of-largest-solar-and-energy-storage-project-in-the-u-s/

2. In addition, the Board of Water and Power has confirmed a new commissioner, Nicole Neeman Brady. She was nominated by Eric Garcetti, she serves as the Chief Operating Officer of "Renewable Resources Group." She is a past member of the Colorado River Board of California. She happens to also be a board of director for the Library Foundation of Los Angeles.

4. The LADWP partnered with the LA Auto Show for the Electric Vehicle Los Angeles Experience (EV/LA). They had a lounge at the Auto Show which opened NOV 22nd. They promoted their rebate websites.

LADWP EV Programs

Plug in and save with EV rebates and special rates

LADWP is committed to a clean energy future, and we're putting our customers first when it comes to helping more Angelenos "drive electric." With our Electric Transportation Programs, we're creating EV communities across Los Angeles. Check out our great programs and resources to help you Charge Up! in your neighborhood. Programs include:

Used EV Rebate
LADWP now offers a rebate of up to $1,500 toward an eligible used EV purchase, making these vehicles more accessible to all. All permanent residents receiving electric service from LADWP are eligible. You don't need to be an LADWP account holder to qualify.

EV Charger Rebates
The most popular choices for charging EVs at home are to plug into a standard outlet or install a Level 2 charger (for faster charging). LADWP offers a great rebate toward the purchase of a Level 2 home EV charger. Installation costs are not included. LADWP also offers rebates for EV chargers installed by

commercial customers (including multi-unit dwellings). LADWP's goal is to encourage the widespread installation of EV charging stations throughout LA.

Special EV Rate
EV owners who charge at night and on weekends can save on charging cost with our special EV rate discount. Call the Charge Up LA! Support Team at 866-484-0433 for help determining which rate plan best fits your needs.

Public Charging
To support convenient EV travel throughout the Los Angeles region, LADWP is collaborating with neighboring utilities and municipal and regional government agencies to install EV chargers across the Southland. LADWP is installing public charging stations at LADWP customer service centers and other public locations.

Additional EV Incentives
Visit www.afdc.energy.gov/laws for other available financial incentives that may help reduce your costs even more.
