Over 80 million passengers passed through LAX in 2016. LAMP (Landside Access Modernization Program) will help alleviate traffic, provide new locations for passenger dropoff/pickup and create positive passenger experience. \$5.5 billion project.

Components (see Addendum A, LAMP Diagram)

- CONRAC (Consolidated Car Rental Facility) – largest rental car facility in the world. Can be converted to other uses if rental car use declines. Not giving a space to car share companies like Maven or Zipcar now, but will accommodate new technologies as necessary.
- ITF (Intermobile Transportation Facility) – large parking structures. Vision is one closer to airport for local traffic, another east of aviation for international.
- Roadway expansions
- ATM (Automated People Mover – like at DFW, other large airports) connects 3 terminals, goes along 96th. Same height as theme building. Too tight to have loop in terminal area. Looking at making connections between terminal the North terminals and South terminals thru Tom Bradley; would be able to check in at any terminal and walk to gate.
- Train: 12-15 minutes from end to end
- Metro Stop

Questions:

- How much labor will be union? Do you expect labor shortages because of current situation? Answer: Large percentage will be union. Has only heard of potential shortages because of other major construction projects. Perhaps will have apprentice programs to have ready labor source.
- CONRAC will eliminate AVIS shuttle buses, but not others? Answer: Will reduce traffic by 40% – some private, some buses/shuttles. Need to individually renegotiate 1000's of licenses.
- What are community complaints. Answer: Different communities have different concerns.
